

## Graduate Program – Onshore Renewables

Our newly launched Graduate Program provides a sought-after opportunity to develop your skillset, all while being part of a highly knowledgeable team and a rapidly growing company.

This position is ideal for you if you're a new graduate seeking to enter the renewable sector.

### Graduate Program Pathways you can follow:

- Site Engineering
- Project Management Graduates for our Onshore Wind and Solar PV Projects
- Asset Performance Management Specialists
- Business Development
- Accounting & HR

### Requirements:

- Bachelor's degree from any Engineering Discipline (for our engineering graduates) or Business Discipline (for our corporate functions)
- Strong academic results with analytical mindset, attention to detail and self-awareness
- Analytical and problem-solving skills
- Genuine Interest for working in the Renewables Industry
- Positive & can-do attitude
- Proficient use of MS Office
- Strong interpersonal and communications skills in English (and Greek for On-Site Pathways)
