

National Energy QHSE Policy

National Energy operates in the development, construction, and long-term operation of renewable energy assets, focused on solar, wind, and battery energy storage systems.

The Management of National Energy has set ambitious goals for zero accidents and occupational diseases, continuous strengthening of the trust of all stakeholders, strong contribution to the reduction of the environmental and energy footprint, which are strongly connected to the development and business prosperity.

For achieving the goals, NE management decides to develop a holistic Management System in the context of Quality, Health & Safety and Environmental aspects, which is under the requirements of the relevant international standards (ISO).

For the implementation of this decision, NE management is committed to:

- Adapting high international standards and best practices in health and safety
- Full compliance with the applicable legislation for all company activities
- The management of threats and opportunities related to the company's operating framework and its objectives
- Provision of safe and healthy working conditions and the elimination of health and safety risks.
- Prevention of incidents to employees and all those affected by the business activity, as well as prevention of pollution for the protection of the environment and other specific commitments related to the Company's operating framework.
- Establishment of measurable objectives for monitoring the critical issues of the Management System and the evaluation of their achievement and effectiveness.
- Provision of the necessary resources and the appropriate information and tools to every employee for the achievement of the objectives & targets for every process
- Continuous improvement of the Management System
- Encourage open dialogue and consultation with every employee on issues relating to health and safety.
- Investment in the continuous training, development, information, awareness, and education of its human resources, to adopt and develop quality, health, and safety at work, and environmental protection in every activity.
- Taking all necessary measures for the Company to meet the needs and expectations of every stakeholder.
- Taking all necessary measures for the compliance of contractors and suppliers with the Company's requirements, on issues of quality, health, safety, and environmental protection.
- Establishment of a corporate culture in Health & Safety and Environment Protection.

National Energy recognizes and rewards teamwork, individual effort, invests in every person and respects everyone affected by business activities. Everyone at National Energy is committed to this policy, by management's active participation and guidance.
